

interior (Rocky Mtn) Douglas-fir

Pseudotsuga menziesii var. *glauca* (Mirbel) Franco

Tree ID: 360

Nickname: Not named

Nominated by: James Steidle, 2013

Photo credit: James Steidle, 2013

Measurements

Height: 43.4 m

Circumference: 4.61 m

Crown spread: 18.0 m

Verified by: Jeff Burrows, 2013

Tree score: 338

Species Rank: 11

Location and ownership

Location: Rosebud Mtn.

Nearest town: Prince George

Regional District: Fraser-Fort George

Ownership: BC Timber Sales

Latitude: 53.419500

Longitude: -123.126917

Elevation:

Notes

Tree/site: Tree has a robust crown that is fairly consistent around the whole tree. The top has broken off some time ago. This tree is in the proposed Rosebud Mountain Reserve (for more information see <http://savingrosebud.com/>).

Access: Drive south on Blackwater Rd. from Prince George for 45 minutes and make a right on Punchaw Rd. at approximately 24 km past Baldy Hughes. Drive down Punchaw Rd. for 6 km. You will be near the top of a high area, locally called Rosebud Mountain. Just before the road takes a sharp hook to the right and enters a thick, old-growth forest, look at the tree tops to your left. You will be able to see this tree at the edge of the forest on the southwest edge of the clearing with a twisted, old top. It is approximately 300 m from the road.
